

We can tailor our programs to address the unique needs of an individual school. The programs:

- increase school attendance
- strengthen children’s social and academic skills
- empower children, youth and families with effective programming to promote both healthy development and school success
- enhance peer relationships, self-control, coping and drug-refusal skills
- drug-abuse prevention programs increase students’ school connectedness and reduce the likelihood of dropping out of school

Who We Are

About Us

Northeast Guidance Center is committed to the health of children, adults and families by providing innovative community-based services through behavioral and primary healthcare.

***SCHOOL BASED
MENTAL HEALTH
INITIATIVE***

School Based Mental Health Initiative

Our School Based Program is committed to providing children and youth at select Detroit Public Schools Community District with a continuum of care aimed at addressing barriers to learning.

A broad and flexible array of behavioral health services and supports are provided directly within the schools including prevention & early intervention, treatment, mental wellness education for parents & educators, as well as assessment of emotional & behavioral risk and protective factors.

School based behavioral health programs are early intervention services to underserved children and their families in schools with established health clinic services.

Promoting School Success

NEGC works to improve access to mental health services for particularly vulnerable children and seeks to provide supportive care for youth at risk of developing Serious Emotional Disturbance (SED) and substance abuse disorders.

“It is through our commitment to best practice treatments that children have the greatest chance to successfully function in home and school settings.”

Sherry McRill, President & CEO

SED eligibility is determined by assessing the acuity of symptoms, duration of symptoms and degree of functional impairment.

NEGC provides supports coordination and Applied Behavior Analysis referrals for autism (age 0-21) and services to persons of all ages diagnosed with intellectual or developmental disabilities.
